

each layer builds on the one below

### **Layer 3 · clinical intent** *(proposed)*

unit: intended action (ACR) · operational by computers  
language models + symbolic reasoning + workflow semantics

### **Layer 2 · clinical state (fact)**

unit: fact · interpretable by computers  
terminologies + structured data + interoperability + NLP

### **Layer 1 · the record**

unit: record · available to computers  
EHR + database + messaging
